Professional Summary

Forward Deployed AI Engineer with 2+ years owning customer-embedded delivery end to end — most recently a smart POS platform across 30+ devices, taking ZATCA Phase 2 from scoping to 100% compliant e-invoicing in production. Scopes complex requirements into plans, drives adoption, and builds in TypeScript and Python.

Technical Skills

AI & LLM: AI-assisted development with Claude and DeepSeek for coding, refactoring and debugging; Generative AI fundamentals (AWS Educate, Oracle Cloud Infrastructure AI Foundations)

Languages: TypeScript, Python, JavaScript, SQL

Production Systems: RESTful API design, system integration, authentication & role-based access control, PostgreSQL, MySQL, Microsoft SQL Server, MongoDB

Modern DevOps: Docker, CI/CD Workflows, Git, GitHub, Linux, Vercel, Cloudflare Workers

Quality & Debugging: Postman, Playwright, API testing, code reviews, performance optimisation

Practices: Agile/Scrum, system design, data migration, clean code, SOLID

Professional Experience

Full Stack Developer | Abdulwaheed Abdrabbo Abdulkhair Mohammed Est.
Jeddah, Saudi Arabia | Jan 2026 – Present

- Take ownership of the smart POS platform end to end — device software and back-office web application across 30+ deployed devices — in TypeScript, Node.js and React.
- Took ZATCA Phase 2 (Integration Phase) from scoping to 100% compliant e-invoicing in production, integrating clearance and reporting APIs via the Fatoora SDK with UBL 2.1 XML, cryptographic stamps and TLV/QR encoding.
- Integrated POS terminals, payment devices, printers and the accounting backend over REST APIs, synchronising 30+ devices and cutting sync failures by ~40%.
- Diagnosed and resolved 100+ hardware and software faults, reducing average resolution time by ~30% and sustaining 99.9% uptime across deployed devices.

Technologies: TypeScript, Node.js (Express), React, PostgreSQL, SQL Server, REST APIs, XML/UBL 2.1, Docker, Git

Full Stack Developer | Othouba Line
Jeddah, Saudi Arabia | Mar 2024 – Jan 2025

- Delivered and maintained a full-stack invoicing and tax reporting platform in React, Next.js and Node.js, processing 5,000+ invoices per month.
- Architected and secured 60+ RESTful API endpoints with input validation and role-based access control, cutting API errors by ~45%.
- Modelled and optimised a MongoDB schema for multi-GB production datasets, improving query performance by ~50% through indexing and aggregation pipelines.

Technologies: React, Next.js, TypeScript, Node.js, REST APIs, MongoDB, Docker, Git

Founder & Full Stack Developer | Koprey
Remote — Malaysia & Saudi Arabia | Apr 2022 – Present

- Founded and run Koprey, delivering 20+ client projects end to end — from first requirements conversation through deployment — across e-commerce, education, real estate, hospitality and F&B.
- Architect and integrate custom RESTful APIs connecting mobile apps, web platforms and Django/Node.js backend services.

- Design and maintain relational SQL databases (MySQL, PostgreSQL), enforcing data integrity, indexing strategies and query performance under production traffic.

Technologies: Next.js, React, Django, Python, Node.js, REST APIs, MySQL, PostgreSQL, Docker, Git

Full Stack Developer (Internship) | MyERP Solutions Sdn Bhd
Kuala Lumpur, Malaysia | Jun 2021 – Feb 2022

- Migrated 365 Microsoft SQL Server tables to 330 optimised MySQL tables, building a custom Windows migration tool with schema mapping and ETL logic.
- Enhanced a PHP-based ERP system with bulk export and import, cutting routine processing from hours to minutes.
- Built Excel-to-database tools in Python and Qt, reducing manual effort by 50%.

Technologies: Python, Qt, PHP, Microsoft SQL Server, MySQL, ETL

Projects

Zam Logix — Logistics Workflow Platform | Solo Developer | Jun 2026 – Aug 2026 | zam-logix.kayat.workers.dev

- Built logistics and workflow tooling on Cloudflare Workers with PostgreSQL persistence, digitising 8 operational workflows.
- Sustained ~200 ms edge response times for 106 daily operations users.

Technologies: Cloudflare Workers, Svelte 5, PostgreSQL, Edge Computing

TaxVerge — Tax & Financial Management SaaS | Solo Developer | Aug 2024 – Oct 2024 | taxverge.pages.dev

- Built a financial management SaaS for tax preparation, invoicing and reporting, shipped across Android, Windows, Linux and web.
- Reached 36 active users at 99.9% uptime with 40% faster tax preparation.

Technologies: Nuxt, Vue, MariaDB, SSR

Education

Master of Business Administration
INTI International University | Kuala Lumpur, Malaysia | Oct 2025 – Oct 2027 (expected)
CGPA 3.76/4.00

Bachelor of Computer Science (Hons) Software Engineering
INTI International University / Coventry University | Kuala Lumpur, Malaysia | Jan 2019 – Dec 2021
CGPA 3.56/4.00 | Final Year Project: Handwriting Pattern Recognition System Using Neural Network

Certifications

- Getting Started with DevOps on AWS — Amazon Web Services (AWS) | Sep 2025
- AWS Educate Introduction to Generative AI — Training Badge | Oct 2025
- Oracle Cloud Infrastructure AI Foundations Associate — Oracle | Sep 2023
- Next.js App Router Fundamentals — Vercel | Aug 2025

Languages

Arabic — Native | English — Professional (TOEFL iBT 104/120, Aug 2025)
